

It is genuine alternative to Dupont Tyvek

TEXONN R is **not** Microporous **nor** SMS. It is a new breathable material which offers Type 456 protection but its does not have the common issues as seen in Microporous or SMS materials.

Full range available : *bunny suits, hooded coverall, collar coverall, sleeves, shoe and boot covers*

Properties of main types of non-woven materials

- Type 6 = liquid chemical
- Type 5 = solid particles and dust
- Type 4 = liquid spray

TEXONN R vs Tyvek Classic Xpert

Tyvek Classic Xpert DO NOT offer liquid spray protection

Breathable

Barrier for dust and particles

Protection better than SMS

Real barrier for liquid

Unlike microporous, protection intact during work

You can also go to [YouTube channel "ISOCEP"](#) or www.isocep.com/texonn-r-for-industrial for the above information.

TEXONN material can also be clean washed and thus can be treated for [controlled environment applications](#).
